

# SOLAR CRIMPING TOOL

## 01 | APPLICATION:

Solar crimping tool for crimping solar male and female solar contacts for cables (2.5/4/6 mm<sup>2</sup>). Solar connectors are easier to install when adding positioning aids and easily replaceable crimping blades.

## 02 | CHARACTERISTICS:

Material:	PP+TRP handle
Length:	270mm
Weight:	0.90Kg
Crimping range:	14-10AWG(2.5-6mm <sup>2</sup> )
Packaging:	Blister packaging
Package Included:	1 pc*Solar Crimping Tool

# WIRE STRIPPER

## 01 | APPLICATION:

This wire stripper tool is sturdy and durable, suitable for electronic components, maintenance, telecommunications industry, power line cutting, and other fields.

## 02 | CHARACTERISTICS:

Handle material:	TPR
Clamp head material:	alloy steel
Pliers handle length:	165mm
Weight:	160g
Stripping diameter:	0.9-6mm
Packaging:	Blister packaging
Package Included:	1 pc*Wire stripper

# CROSS WRENCH STRAIGHT WRENCH

## 01 | APPLICATION:

The two types of wrenches for solar connector tools are regular and cross wrenches. The PV installation wrench is mainly used to lock the screw cap and unlock the MC4-T/ Solar fuse diode/ Solar connector.

## 02 | CHARACTERISTICS:

Material:	PPO
Pliers handle length:	165mm
Weight:	160g
Cross Wrench for:	18/19/21mm end size Connector
Straight Wrench for:	19mm end size Connector
Includes:	2x Solar Connector Wrench
